

## ***Turnaround Assistance Services Line***

### **Turnarounds Preparation & Event Management Training**

Turnarounds are an exciting, fluid, yet challenging necessity in the lifecycle of most operating facilities. These events can often be dreaded by the owners as they can burn the equivalent cost of the annual maintenance budget in one short period of a few weeks. Add the revenue lost during the downtime and we can all appreciate the desire to achieve a safe, efficient and timely event. To do this we must focus on the right scope and deliver it well.

### ***Turnarounds – Get the Cost Right***

Welcome to Element three in the Canoco Turnaround Preparation & Management series of building your team and knowledge on the road to “Execution with Excellence”. This is a hands on full day session related to cost awareness and detailed cost build-ups. Learn to work your way to an accurate repeatable budgetary cost for your event and how to factor the unknowns. Our process has hit the mark on every event we have managed.

Participants will;

- Create an extensive list of all things cost – as you engage you will work to create your own detailed cost roll-up from our budgetary estimating tool – then continue completing it when you return to your site
- Learn how to estimate these costs – even if we know what will cost money – how do we know how much to budget. How can we become predictable
- Learn how to gain the trust of your sponsor or leadership team by providing them with the cost data they need – set your leaders up for success
- Workshop the top 10 cost control issues common to Turnaround events and create strategies to avoid them at your site.
